Tucumcari needs more money. Our business is here right now to justify a library.

Tucumcari must have systems of waterworks. The Commercial Club would take this matter up and see if such can be had.

There are free trams to be used for farm trading in this city every day and our county commissioners will look after the country roads this year it will help out very materially.

The streets of Tucumcari are looking better and in two or three months there will, at the present rate of improvement, be a decided change in the general appearance of the city. In this particular street and Baker are keeping the grader busy.

There has been a number of city ordinances passed this month that are soon to be in operation and effect, so it will be well for those who have not already read them to inform themselves as to the provisions thereof. A curfew law is among them and will "we have been informed" be enforced to the letter.

The Commercial Club of this city is taking up for consideration the improvements of our public schools and the matter is going to be thoroughly canvassed. Anything necessary will be done to relieve the situation next year and those who have considered this an obstacle in the way of their locating in this community need suffer no further inconvenience.

The Tucumcari News has purchased the Tucumcari Times and the two papers have been consolidated under the name of the Tucumcari News and Tucumcari Times. The Southwest is rapidly becoming a land of one paper to the town, and it is hard to find a section of the United States where there is printed a better class of country newspapers than in the Southwest. Nana Visa New Mexican,

Revolving door Tucumcari, from & revolving door - this were sold to us by your messenger. This enterprise however was not very successful and we left it for over \$20,000.00 because it is a capital idea of Edith. Do you want to sell it?

Secretary of War Taft is asking for a large amount of money to add to the naval defense of Hawa-ii and the Philippines so that the United States may make a proper defense of the islands in case of war. We should not be surprised that these improvements are going to be in demand very soon.

The portion of the Colorado river into the Salton Desert is forming an island on which it is estimated will soon be as large as Lake Michigan. National legislation is now being discussed whereby this may be allowed to continue until the Salton sea is filled up to the level of the Gulf of California and a canal cut through to connect it with the ocean. It is claimed that it will be the means of absolutely changing the climate of California, Arizona and New Mexico and turning the arid deserts of these into fields of fruit and grain. This lake will be the means of giving New Mexico and Arizona an abundance of rain fall and a more equitable climate throughout the year. Many prosperous towns it is claimed will be established along the line of the canal to the ocean. This is a very feasible conclusion and we hope will materialize immediately. The cost of the proposed canal will not be greater than \$2,000,000,000.
